

Exercise-2

A story on prioritisation

❖ **The Setup**

- ❖ You're driving down the road in your car on a wild and stormy night. The weather is like a hurricane, with heavy rains, high winds, and lightning flashing constantly. While driving, you come across a partially-covered bus stop, and you can see three people waiting for a bus:
- ❖ An old woman who looks as if she is about to die.
- ❖ An old friend who once saved your life.
- ❖ The perfect partner you have been dreaming about (your "soulmate").
- ❖ Knowing that you only have room for one passenger in your car (it's a really small car), which one would you choose to offer a ride to? And why?

The Dilemma on prioritisation

❖ **Discussion**

- ❖ You can pick up the old woman, because she is going to die, and thus you should save her first. Or you can take the old friend because he once saved your life, and this would be the perfect chance to pay him back. However, you may never be able to find your soulmate again.
- ❖ I encourage you to think before you continue reading, and see what answer you come up with. It may also help to close your eyes and visualize the situation.

Smart Prioritization

❖ “I would give the car keys to my old friend, and let him take the old woman to the hospital. Then I would stay behind and wait for the bus with the partner of my dreams.”

A step taken by you participants for prioritization

- ❖ You all prioritized yourself to be here at APHRDI, Bapla from 30th January to 1st February, 2017 for
 - 3 days
 - 72 hours
 - 4,320 minutes
 - 2.59 lakh seconds

Thanks for prioritization and your decision to attend this training.

END
