Need for the course

The training course will equip the participants with a range of emerging practices and examples of how e-Government and e-business services can be undertaken by government/public sector organizations to strategically plan and transform their organization to:

- Realign government service delivery with the citizen focus
- Improve transparency, accountability and trust in the government
- Improve the citizen experience in Government transactions, reducing time, costs and administration burden for government agencies

Objectives

- Need for change in current service delivery model and role of e-Governance
- National e-Governance Plan, MMPs, institutional structures and related policies
- e-Governance evolution model and approach for implementation of e-Governance
- Lifecycle and phases, scope, approach and deliverables in each phase in e-Governance project development and implementation
- Approach for addressing project requirements during the lifecycle
- Role for private sector participation..
- Capacities and resources required for e-Governance implementation
- Policy and legislative framework support for e-Governance

A Typical day during the training...

- Four sessions per day
 - Two sessions pre-lunch
 - Two sessions post -lunch
- Each session is of approximately 60~90 minutes
- Each session can be:
 - Theoretical or conceptual discussion
 - Discussion on real life examples (successful e-Governance initiatives..)
 - Classroom exercise on application of concepts learned during the training...

Expectations from the course

What are your expectations from the course?
